Clarification:
All of the html pages are core screens meant to aid in the producers actions. Number of html pages are reduced by one from original wireframes as long touch will be used to implement functionality of another wireframe to another.

- common_page.html is generic landing page
- producer1.html lets user choose timeslot
- producer2.html shows available DJ's to assign to timeslot
- producer3.html shows playlist to assign to DJ
- producer4.html lets user add song to a playlist
- producer5.html meant to
